Murugan Athmagnanam

SENIOR UI ENGINEER | FRONTEND ENGINEERING

Bengaluru, India | +91 8778600028
1murugan23@gmail.com | github.com/MURUGAN96

PROFESSIONAL SUMMARY

Senior UI Engineer with 8+ years of experience delivering customer facing web applications across large scale retail, ecommerce, and enterprise environments. Strong expertise in React, Next.js, TypeScript, frontend architecture, and authentication systems. Proven experience rearchitecting critical OAuth flows, improving guest session continuity, and delivering account linking integrations with external identity providers. Experienced in accessibility, production ownership, observability, release management, and cross functional technical leadership.

TECHNICAL SKILLS

FRONTEND ENGINEERING
React, Next.js, TypeScript, JavaScript ES6+, HTML5, CSS3, SCSS

UI ARCHITECTURE
Reusable components, shared component libraries, responsive design, CDUI, component driven development, accessibility

AUTHENTICATION & IDENTITY
OAuth architecture, login and account journeys, guest authentication, token validation, refresh token flows, account linking, GSP

TESTING & DELIVERY
Jest, Cypress, Puppeteer, Storybook, unit testing, integration testing, CI/CD, code reviews, release management

TOOLS & OBSERVABILITY
Git, REST APIs, GraphQL, Chrome DevTools, Grafana, Kibana, Bugsnag, OpenTelemetry, ServiceNow

EDUCATION

Bachelor of Engineering
Anand Institute of Higher Technology, Chennai
2014 to 2018 | CGPA: 7.6 / 10

PROFESSIONAL EXPERIENCE

Senior Engineer
Mar 2024 to Present

TARGET

- Own frontend engineering delivery for customer facing Login and Account experiences on Target.com, supporting critical authentication and account journeys across a large scale retail platform.
- Rearchitected the OAuth authentication flow, improving guest session continuity and reducing guest logout drop offs from approximately 100,000 to 1,000, a reduction of about 99%.
- Designed and integrated account linking experiences with external identity partners including Google, Microsoft, and ChatGPT.
- Build and maintain production UI features using React, Next.js, TypeScript, and shared platform components with focus on reliability, maintainability, accessibility, and consistent customer experience.
- Partner with Authentication Engineering on GSP integrations, guest authentication, token validation, refresh token behavior, and resilient session handling.
- Drive implementation, testing, code review, weekly releases, deployment coordination, and post release monitoring; participate in production support and incident investigation.
- Use Grafana, Kibana, Bugsnag, and OpenTelemetry to investigate customer impact, identify failure patterns, and coordinate resolution; provide technical guidance through design discussions, debugging, reviews, and knowledge sharing.

UI Engineer
Dec 2022 to Feb 2024

WISSEN TECHNOLOGY | CLIENT: FLIPKART

- Developed frontend features for the Flipkart Marketplace Seller Platform, supporting seller business, product, and order management workflows.
- Improved frontend delivery and maintainability through code optimization, image compression, and lazy loading.
- Translated product requirements and design wireframes into responsive, production ready interfaces with design and product teams.
- Contributed to frontend technology improvements, package vulnerability remediation, ongoing maintainability, seller engagement features, and iterative product enhancements.

Front End Engineer
Jun 2021 to Dec 2022

ACCENTURE

- Built and maintained frontend features for enterprise client applications including work associated with AbbVie and Cooper Tire.
- Implemented UI changes using JavaScript ES6, React, and DOM APIs; investigated and resolved browser side defects using developer tools.
- Supported unit and integration testing, prepared test cases, and improved quality through defect resolution.
- Managed change requests and issue tracking through ServiceNow while collaborating with technical and business stakeholders.

Web Developer
Jun 2018 to Jun 2021

INFINITI SOFTWARE SOLUTIONS

- Developed and maintained frontend functionality for GroupRM, an airline group revenue management and booking system.
- Integrated external APIs from Global Distribution Systems and supported payment gateway integrations.
- Resolved UI layout and integration issues, reused existing components and code, and recommended business process improvements.
